

The Animal Kingdom

Some animals make their homes in trees
so do some insects and buzzing honey
bees.

Others burrow away in the earth so deep
then curl up inside for a winter-time
sleep.

Camels live in the desert hot and dry
storing water in their humps so that they
won't die.

Yet the Polar bear with his white coat so
nice
has to fish through a hole he made in the
ice.

No matter whether animals are big or
small
they know that its Allah who has made
them all!
