**1.8 million people** in Iraq are **displaced (IDPs)** due to conflict and violence - this is one of the largest internally displaced populations in the world.

**Homeless** and having left their support networks, IDPs, are among the world's most **vulnerable** people.

500,000 IDPs in Southern Iraq are without adequate **food, water** and **shelter**; The World Federation has identified 1,000 families who need our help **urgently**.
